

HOW WILL OUR SOCIETY DEAL WITH THE GALILEOS OF THE DNA AGE?

Controversial genetics and artificial intelligence discoveries thrust young scientists into conflict with powerful government interests, resulting in unintended and potentially explosive consequences.

Available in bookstores and online.

“... Julia delivers the goods
... Fischer’s premise is a
whopper, that life on Earth
can be expressed as a series
of mathematical equations
that, if let loose in the
data-rich web of cyberspace,
will mutate in marvelous,
unpredictable ways.”

—**Willamette Week**

“Fischer’s world is strong on
imagery . . . A successful
introduction to the series.”

—**The Denver Post**

“...the future of science,
all science, is not what
it used to be.”

—**The Kansas City Star**
